	AA survey was conducted in October 2008 and no evidence of WBCR was
	yed. No interviews were conducted during the survey. However, comments ed in 2007 cite secondary contact recreation, including photographs of
	e playing, wading and fishing in the stream.
Is the evaluated use a	attainable?
sites e evider stream WBCI	ream did not met either the maximum or median depth criteria at any of the valuated. However, comments received in 2007 included photographic nee of the stream attaining the 1 meter maximum depth criterion. Due the n meeting the maximum depth criterion, the committee recommends that the R use designation be retained. Due to evidence of secondary contact tion, the committee recommends that the SCR use also be retained.
